

# INTRODUCING THE NEW SOLAHART SOLAR-READY WATER HEATER

## EMERGENCY HOT WATER TODAY **READY FOR SOLAR TOMORROW**

**Solahart Streamline Solar-Ready is a dual-purpose electric water heater for people who need hot water in a hurry and are considering going solar in the future.**

As a like-for-like replacement of an equivalent-size electric water heater, the solar-ready tank will provide immediate hot water to your home in an emergency. It also comes with built-in solar connections that make it easy to upgrade to solar hot water when you are ready to make the switch.

## UPGRADING TO SOLAR HOT WATER IS EASY

When you're ready to go solar, whether it's in a couple of months or a couple of years, your solar-ready electric water heater can easily be upgraded to a solar hot water system. All you have to do is organise the installation of rooftop solar collectors and a Solar Upgrade Kit to the pre-existing water and electrical connections on the solar-ready tank.

## USE IT AS A SOLAR-SMART ELECTRIC WATER HEATER

Alternatively, your solar-ready water heater can also be upgraded to a solar-smart electric water heater by linking to solar power panels on your rooftop, with the addition of a Solahart controller module, a power metre and an Energy Management Unit (EMU). Any excess energy generated by your solar power system can then be stored and turned into hot water, minimising the amount of power you draw from the grid. Like a battery, it stores energy – but it's more affordable.

## WHY A SOLAHART SOLAR-READY WATER HEATER IS A SMART CHOICE

- ✓ Get back into hot water quickly
- ✓ Designed to operate as a single-element (3.6kW) electric water heater
- ✓ Features a high-quality durable vitreous enamel-lined tank
- ✓ Comes with built-in solar circuit inlet and outlet connections
- ✓ Allows easy upgrade to a solar water heater in the future
- ✓ Take advantage of Small-Scale Technology Certificates (STCs) when you upgrade
- ✓ 10-year cylinder warranty
- ✓ Also upgradeable to a smart-electric water heater, to use excess solar energy from your solar power system
