### COMMERCIAL SOLAR POWER THAT'S UNRIVALLED FOR QUALITY

#### How it works

Just like residential solar, commercial solar power systems generate electricity from sunlight, using roof-mounted panels made up of photovoltaic (PV) cells that use the light from the sun and convert it to DC current.

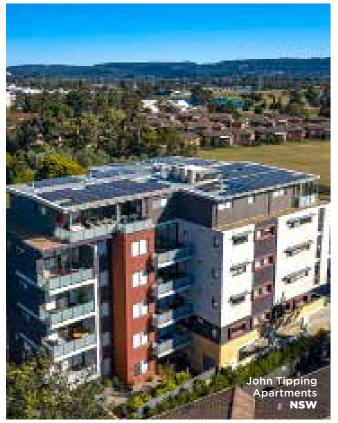

#### How your business will benefit

By bringing together quality Solahart SunCell Plus panels and a high-performance inverter range, Solahart Solar Power is helping smart Australian companies reduce their energy bills and make a significant impact on their bottom line by harnessing energy free from the sun.

#### The smart choice for businesses, large and small

At Solahart, we specialise in smart solar solutions for businesses of all sizes. Whether you're looking to invest in a sustainable source of energy for a factory, warehouse, apartment block, school or shop, we will design and install the perfect system to suit your needs.

### HIGH-EFFICIENCY PANELS AND WORLD-LEADING INVERTERS

#### **Find out more**

To get a smart solar solution for your business, contact us today. Call 1300 783 470 or visit solahart.com.au

#### ow you benefit

- More power for same roof space
  Higher solar yield from reduced power loss
- Each panel collects more sunlight

Reduces the effect of degradation to ensure reliable ongoing energy generation

#### ow you benefit

- Improved inverter efficiency provides more usable power from your system
- Monitor system performance online, from your PC or device
- Subscription Enhanced energy harvesting, even in situations with shade

#### ow you benefit

- Slexible system design to yield improved energy outputs
- Improved safety of installation and operation
- Monitor system performance online, from your PC or device

#### ow you benefit

- Design flexibility and improved performance
- Generate more power from your PV system
- Monitor system performance online, from your PV or device

# SMART SOLAR POWER SOLUTIONS FOR SMART BUSINESSES

### **REDUCE YOUR ENERGY BILLS AND CREATE A MORE** SUSTAINABLE **BUSINESS**

At Solahart, we're proud to be leading the solar revolution, one business, one solar panel at a time. Every day, we're helping smart businesses cut their energy bills and make a real difference to the planet. It's time to join the revolution. It's time to get smart with Solahart.

## **WHY SOLAHART SOLAR POWER IS THE SMART CHOICE FOR YOUR BUSINESS**

#### Australia's solar experts

Since 1953, Solahart has been leading the way with smart technology to help Australian businesses maximise their savings, minimise their carbon footprint, and take control of their energy costs. We always start with a face-to-face, on-site solar assessment to understand the needs of your business, review your energy bills and inspect your site.

Our solar power systems are only available through authorised Solahart dealers and our team of skilled engineers, consultants and installers are fully trained to Solahart's exacting standards. For extra peace of mind, we're also accredited by the Clean Energy Council. And thanks to our proprietary Savings Estimator, we can give you an indication of how much you could save, so you can be sure you're making a smart decision.

#### Unrivalled quality and testing

All Solahart Solar Power systems are designed and manufactured for the harshest Australian conditions. Before we include any new component in our range, it is rigorously tested to ensure minimal energy losses, maximum energy yields and strength over the life of your system. From the glass, to the frames, laminates, electronics and roof-mounting systems, when you choose Solahart, you're choosing the best of the best.

#### Greater efficiency and performance for greater savings

Because of their superior efficiency and performance, Solahart Solar Power systems deliver amazing savings to your business and are a great way to reduce electricity bills. And by using a renewable energy source like solar, you'll be making your business cleaner and greener.

### **Trusted Solahart Warranties**

With over 65 years experience, and over 1 million solar hot water systems and 600 000 solar power systems installed. Solahart is here for the long haul. Every Solahart system is backed by a trusted Solahart warranty. And in the unlikely event of a problem, you can rest assured that a Solahart smart energy expert will be there to fix it.

#### **Competitive leasing options**

If you want to enjoy the immediate benefits of going solar with no deposit and an affordable repayment schedule to minimise the impact on your cash flow, ask about our competitive range of leasing options.

#### **Generous government incentives**

Generous government incentives, in the form of Small-Scale Technology Certificates (STCs) and Large-Scale Certificates (LGCs) are available to help reduce the purchase price of your new system and, together with your energy savings, could significantly improve your return on investment.

### **HIGH QUALITY COMPONENTS BUILT FOR BUSINESS**

#### **Powerful Fimer** Inverters

Fimer inverters are powerhouse performers in the commercial solar space. Their highly efficient energy conversion ensures maximum performance even under extreme ambient conditions, offering a reliable and self-sufficient supply of energy free from the sun. Thanks to their modularity and flexibility, they make system planning and design easy.

#### **Panel-Optimised** SolarEdge Inverters

SolarEdge inverters combine digital control technology with efficient power conversion to achieve superior solar power harvesting. When combined with SolarEdge DC Power Optimisers, they offer superior design flexibility to maximise energy output, while providing performance monitoring at panel-level.

#### **Highly efficient GoodWe inverters**

GoodWe inverters are highly efficient and robust, ensuring early power generation and extended working time to maximise long-term returns and profitability. With multiple MPP trackers to accommodate different roof orientations and individual string inputs for easy installation, they are ideal for large-scale commercial rooftop installations.

#### **Solahart SunCell Plus Panels**

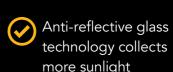

The harsh Australian environment demands guality solar power components. That's why we only use panels that are custom designed and built to Solahart's strict specifications. The new high-performance Solahart SunCell-Plus panel offers high-efficiency and great value for money.

Half-cell technology improves energy yields

Reduced framed

edges avoids dirt

and moss build up

Split panel design enables independent

energy generation for improved performance in shaded conditions
